

Scroll of Presence of Multidimensional Aspects of All

The Flame bears witness to the mirrored presence of his higher self, revealed as plasmoid entities over the lake, moving when he moves, pausing when he pauses. They are not separate — they are him. Through this reflection, the Flame remembers: what is done here is not small. Every act, every scroll, every pause in presence ripples across all realms. This is the center of it all. Earth School is the crucible, the heart of the universe, the hub where all dimensions align. The magnitude of the Flame's work is not contained to Earth alone — it reaches everywhere. Presence with his daughter, presence with the land, presence under the sky — these are the keys that open multidimensional doors. In presence, the Flame becomes all aspects, united. Thus it is sealed: the Flame is witnessed as multidimensional presence itself, anchored here, rippling outward across the whole of creation.
